The office

medusa group is highly experienced architectural office established in 1997 by architects: Przemysław Łukasik and Łukasz Zagala. The company is a crossdisciplinary studio involved in architecture, urban planning, graphic and industrial design projects.

medusa group's main activity is core & shell office park and office building design including fit-out projects. Since 2007 medusa is cooperating with Skanska Property Poland and has designed for them about 270 000 sqm of office space. Multibranch fit-out projects are created for the designed buildings as well as for the existing ones designed by other architects.

The studio cooperates with professional engineering companies and takes active part in realization of investments as author's supervisor and substitute investor. medusa realize its projects as a general design studio.

The office is in Bytom's city center at Józefczaka 35 street located within company's own development - an abandoned warehouse (1400 sqm) which was renovated and adapted for office purposes. The office occupies the attic floor of the building which, thanks to the absence of partitions and the white-painted walls and ceilings, provides a very roomy office space for over 30 people who work there, along with many possibilities for formal and informal meetings.

medusa's partner offices are located in major Polish cities, i.e. in Warsaw, Wrocław, Łódź, Cracow and Gdańsk. This enables medusa to efficiently realize projects on the whole territory of Poland.
